

## Archway Newsletter

### Virtual Training Options

Archway is offering virtual training options through live online training classes. Since in person classes are currently not possible due to COVID-19, we are transitioning our normal live training classes to online! Here are two of the classes we have available with more being added as the COVID-19 situation evolves.

- **MicroStation User Update - V8i to CONNECT - July 27-29, 2020**
- **OpenRoads Designer Fundamentals - July 27-29, 2020**

Your health and safety is our number one priority when it comes to training. We will stay up to date with all of the recommendations from the state and the CDC. Until it is safe to hold in person classes again, we will continue to offer the same quality training you have come to expect from Archway through our online platforms.

Please reach out if you have any questions about technical requirements or would like to set up a custom class for your company.

## Report: Meet Social Distancing Challenges with LEGION Simulator and OpenBuildings Station Designer

### Retail Distribution *User Proximity*

During this unprecedented time, Bentley wants you to know they have your back! With extended free subscription periods for certain software to helping you meet the challenges of new regulations. **New users can get free access until September 30, 2020** to OpenBuildings Station Designer which includes LEGION modeling capabilities and LEGION Simulator which includes simulation and analysis capabilities.

*OpenBuildings Station Designer* and *LEGION Pedestrian Simulator* can work together to help you achieve social distancing protocols in your office, retail space or station. See the video above to show how LEGION can simulate how people flow through your space. It can be used for space utilization, evacuation and operational plans analysis. The newest

update that is coming soon will include enhancements to simulate and analyze social distancing related scenarios and plans. You can see more about Bentley's plans with OpenBuildings Station Designer and LEGION Simulator on their website below.

## LEGION Social Distancing Plans

Archway recently conducted an academic webinar featuring a demo of OpenBuildings Designer. See a building designed, modeled, drawn, clash detected and quantity takeoff from scratch in 45 minutes in OpenBuildings Designer. Simple, easy parametric doors, windows and other features. Once you place them, you can click on them later and heads-up dimensions are right there to edit. See the 3D model of structure, architecture, and mechanical. All of this with elevation drawings, computational design, and energy analysis all included. You can check that webinar out here:

### USC BIM BOP 2020

This year, the 14th annual USC BIM BOP on July 9-10th, 2020 will be held entirely online. Because of this, the event is free this year! There is a great lineup of speakers and Boppers set to give insight to a number of exciting topics in the industry.

There will be three sessions with three speakers each, moderated breakout sessions with the speakers, and 11 BIM BOPS! Bentley's own Mark Enos will be presenting one of the BIM BOPS on OpenBuildings Station Designer & LEGION Simulator.

Check out more information about the topics and speakers, [and sign up](#), on the USC BIM BOP 2020 website.
