The 13th Annual USC BIM Conference - BIM BOP 2019!

Join us at USC's annual BIM BOP 2019 on Friday, June 28th 8am - 5pm. The 13th annual BIM conference at USC is an excellent opportunity to get caught up on the current state of BIM in the AEC building industry. Come hear expert speakers speak about building information modeling. There will be over 30 speakers grouped in sessions about BIM in architecture (both small and large firms), construction, engineering & fabrication, landscape architecture, and Rhino-Revit interoperability.

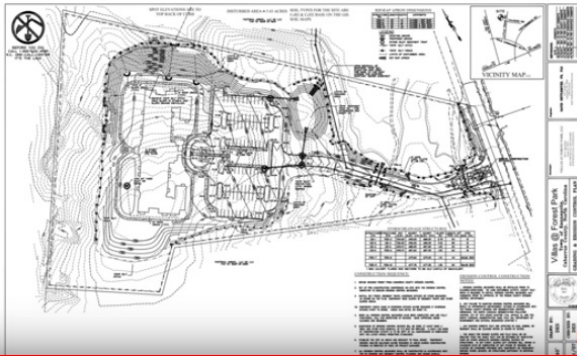

The price is only \$55 (until June 20th!) including lunch! An additional benefit is the 5 AIA CEUs or 5.5 CM-BIM CE credits that you will earn by attending the entire event.

Report: OpenSite Designer

If you do site design, you've got to check out Bentley's new OpenSite Designer that replaces InRoads Site, Geopak site and adds some SiteOps, gINT, LumenRT and parametrics to make the software one that will quickly become your best friend. To get a first look, spend just 3 minutes seeing how easy it is to layout a new site:

<https://www.youtube.com/watch?v=Pb41D32skCc>

Follow up by digging deeper into the function most relevant to your work. For example, where does your data come from to start your design - point cloud? reality mesh? photogrammetry? TotalStation survey? or a terrain model from some other software? Doesn't matter! OpenSite Designer can start from any combination of those data sources.

Here are some examples you can look at using OpenSite Designer:

- See a 3D reality mesh inside OpenSite Designer here: <https://www.youtube.com/watch?v=BPToGpiCYAU&feature=youtu.be>
- Watch OpenSite Designer extract existing ground information from a reality mesh here: <https://www.youtube.com/watch?v=VmTA2JA43Mk&feature=youtu.be>
- Watch the build of a 3D computer model of the new site: <https://www.youtube.com/watch?v=svyy00RWjSA>
- Now see the construction drawings production: <https://www.youtube.com/watch?v=OJYjpmTVRIs&feature=youtu.be>

For more information on OpenSite Designer, just reply to this email.

Upgrade to MicroStation CONNECT - Webinar Series

This July, Bentley is hosting an upgrade to MicroStation CONNECT Edition webinar series to help users take full advantage of their investment in Bentley. There are six free webinars & online classes you can take part in to learn more about the new CONNECT Edition of MicroStation.

- **2 Hour Webinars:**
- [Working with Connected Projects and Connected Users in the CONNECTION Client](#) - 7/4/19
- [Solids Creation in MicroStation CONNECT Edition](#) - 7/4/19
- [Sheet Creation and Indexing with Named Boundaries in MicroStation CONNECT Edition](#) - 7/25/19
- **Classes:**
- [Train the Trainer Master Class](#) - 7/16/19
- [Quickstart for MicroStation CONNECT Edition for Existing Users](#) - 7/22/19
- [MicroStation CONNECT Edition Basics for Civil Designers FULL](#) - 7/29/19

ProjectWise: More Productivity + More Efficiency = Better Bottom Line

ProjectWise is an all around great solution for your data management needs that allow your design teams the ability to collaborate and manage project data efficiently with a single source of truth for your data. ProjectWise helps eliminate duplicate copies floating around your offices and allows everyone to have the latest information, real-time. It also grants your reviewers easier access to be able to view the progress on the project and redline your models without needing the ability to edit the design itself. ProjectWise helps your teams be more efficient and more productive giving you a better bottom line!

Want to know if ProjectWise could help your business' bottom line? Find out more at for our upcoming webinar on **Tuesday, July 9th at 10am PDT!**
