2021 Virtual Bentley Bash - Session Recordings

The 2021 Virtual Bentley Bash was a great success thanks to you, our users! It was the largest event the SoCal Bentley User Group has hosted!

And this year, each of the sessions were recorded. If you weren't able to attend the event, you can now go back and watch the sessions that were available. This is a great resource to take advantage of. Learn more about MicroStation, RAM, OpenRoads, OpenBuildings, WaterGEMS, and more. Interested in any other software that Bentley has acquired over the last few years? There are a few sessions on those software specifically including PLAXIS, CUBE, SYNCHRO and LEGION.

For those that did register, just a reminder that the Bentley Bash software license ends **March 1st, 2021**, just one week! Try out the software you want to now and let Archway know when you are ready to buy your own license! We'd be happy to help figure out the best solution for your company!

Report: Virtual Learning through a Pandemic

Don't feel like learning how to make sourdough bread or any of the other COVID productivity trends? Learn something useful for your career by learning virtually with Bentley.

There aren't many positives to a global pandemic, especially when it comes to jobs and the economy. One of the silver linings though seems to be the abundance of virtual on-demand learning content that has become available during this season.

Most companies, including Bentley and Archway, have made the transition to online learning

platforms and events. This makes it easier than ever to record these sessions and make them available on-demand! As the user, you have greater flexibility than ever to learn on your own time at your own pace.

Some of the notable events that Bentley has provided on-demand content for this past year is the Year in Infrastructure Conference that was held exclusively online as well as their ACCELERATE webinar series and their TwinTalks. Combine that with the most recent Virtual Bentley Bash from the SoCal Bentley User Group and the availability of the LEARN server to anyone with a Bentley software license and the possibilities are seemingly endless.
